

# UEMO 99/253 Corrected

This is an addendum to the UEMO document 99 / 016.

## Shared Care 29/10/1999

Chairman: Dr. Ole Svendsen (DEN)

Rapporteur: Dr. Eugene O'Connor (IRL)

Participants: Slovenia, Austria, U.K., Sweden, Iceland, Germany, Luxembourg, Belgium, France

UEMO document 99/016 rev. Had been accepted before, but it was decided that paragraph 7 and 8 should be preceded by > may be enhanced by < so that the final paragraph now reads

" Shared care may be enhanced by:

7. Portable patient records - perhaps electronic - carried by the patient, and
8. Extended Information Technology between primary and secondary care. The success of this co-operation for the optimal benefits of the patient will require a spirit of mutual professional respect as well as respect for the patient's autonomy."

It was decided that this document be circulated to U.E.M.S. and C.P. and P.W.G.

It was proposed that a working group on clinical guidelines be set up, but it appeared that this matter was already being handled by the Working Group on Quality Assurance so a new group was not necessary.

Having completed its business, the working group proposed that it be discontinued.
