Slovene statement

Slovenia is strongly supporting the UEMO Statement on specific training in GP/FM .

Slovene Medical Chamber trusts that our delegates in all professional organisations concerned: UEMO, UEMS and WONCA-ESGP/FM will strongly support our statement and continue lobbying process regarding Directive in Brussels.

Both UEMO and WONCA (ESGP/FM) have to develop clear principles regarding future development for specific training in GP/FM: structure of academic Departments of general practice/family medicine, clear statements on training posts, trainers and trainees, monitoring of programs and training posts, as well as contents and curricula, length of training and ways of assessment at the end of specific training.

We trust our delegates to promote these principles actively and clearly at European level, in collaboration with ESGP/FM.

We encourage our delegates and other UEMO members to support these principles within their countries and in professional and/or political meetings.

Medical Chamber of Slovenia
Marko Bitenc, M.D.
President
