PROPOSITION WORKINGGROUP

How to encourage medical students for a profession as G P 's

During our last meeting in Stockholm, I had the impression that , independently of the organisation of medical care , students no longer choose for our lovely profession.

In this workinggroup I propose to study

- 1/ if my impression is correct in the different countries, member of the UEMO
- 2/ if yes, what can we do about it
 - * as professionals
 - * as political advisors
 - * as academic responsables

As always it seems to be very interesting to initiate this working group by studying the different situations in different countries.

We should try to compose an equally balanced group of GP's , as wel for the payment (salary or payment according to performance) as for the organisation.

Soon I think that this group will feel the need of knowing the different working conditions and fees.

For example what is the fee for consultation , infiltration, ECG, and so on.

Can G P 's do technical examinations and what are the working conditions, what are they payed for.

During the meeting in Stockholm, I spoke with representatifs of Switserland, Luxembourg, Portugal, Spain, Sweden ... and I had the impression that they supported the idea of a working group.

I would be very gratefull if you could consider the opportunity of this proposition.
