Author	Dr Jens Gredal
Date of transmission	October 23, 2007

3 things are high on the agenda for the Danish GP

1) There are an increasing shortage of GP, first in the rural areas and now its coming to the larger cities. The shortage will last for 10 years, in the meantime several solutions are thought out, importing doctors from abroad: Poland, the Baltic states, the costs are about 125000 euro per doctor. Trying to make the old doctors going on for another year or two, price 25000 euro per year.

2) We are warming op for a new agreement with counties, to be settled in 2008. Our goal are more money for a higher quality of care.

3) The government has launched a grand plan for improving the hospitals etc. the next 5 years, with a sum of 7000000000 euro, the GPs think 10% should go to us .

Jens Gredal
